Message from Medical Director

After completing my fellowship in Pediatric Cardiology, I had the privilege of working with some of the finest hospitals in India and abroad. Those experiences shaped my vision and deepened my belief that every child deserves access to world-class medical care.

When I returned home, I realized a gap — Multi speciality hospitals were largely adult-centric, and general pediatric setups lacked the infrastructure and specialized approach for complex pediatric conditions. As a result, many trained pediatric specialists, including myself, had to compromise on our practice.

That realization became a turning point. From this vision, KIPS was born — a center dedicated entirely to children.

Today, when I look at what we have built together, I feel proud to say — Yes, we did it. But even more than that, I feel inspired — because this is just the beginning of a journey to redefine pediatric superspeciality care in North India.

Dr. Abhinav Agarwal

Message from Director : Clinical Operations & Academic

Our team of expert superspecialists is dedicated to providing advanced diagnostics and treatment across Pediatrics and Neonatal Care, supported by state-of-the-art technology and upgraded infrastructure.

In my dual role, I lead the integration of clinical services with robust academic training programs, including Fellowships and Certificate Courses, ensuring that our patients benefit from the latest evidence-based care.

On behalf of the hospital leadership, I pledge that every patient will be treated with dignity, every family will be supported with empathy, and every team member will be empowered to pursue excellence.

Dr. Digvijay Chaudhary

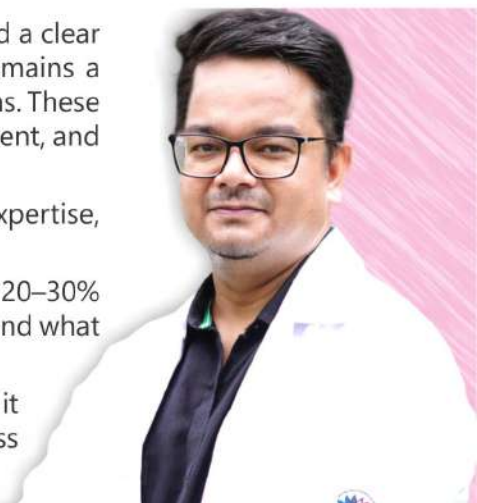

Message from Managing Director

Over the years, my journey in pediatric and neonatology healthcare has revealed a clear reality — while many hospitals excel in routine and emergency care, there remains a crucial gap for children with complex, rare, or diagnostically challenging conditions. These limitations often arise from the lack of advanced technology, specialized equipment, and true multidisciplinary coordination.

Each such experience strengthened my resolve to create a place where expertise, compassion, and innovation come together under one roof.

This vision gave birth to KIPS. Our focus is not just on routine cases, but on those 20–30% of children who require advanced, technology-driven, superspeciality care, beyond what a general pediatric hospital can offer.

At KIPS, we believe no family should ever have to compromise on quality when it comes to their child's health. Our goal is simple yet profound - to make world-class pediatric superspeciality care accessible right here in Lucknow (Uttar Pradesh).

Dr. Suraj Mishra

First-of-its-Kind **Comprehensive Pediatric Superspeciality** Hospital in U.P.

VISION

- Recognition as a leading centre for Advanced Neonatal & Pediatric Care.
- Combining excellence in clinical care, academic training & community outreach.
- Shaping a new era in child healthcare-built on expertise, empathy & innovation.
- Build Academic & Research centre to create a centre of excellence.
- Develop structured Fellowship & training Programmes in Pediatric super specialities.
- Combining Science with Compassion, to heal, protect & empower young lives.

WHY KIPS

General Pediatric Hospital	ALTIS-KIPS Pediatric Superspeciality
Focus on Routine Illnesses	Advanced care for complex, rare and critical cases
General Pediatricians	Dedicated pediatric super specialists (Cardiology, Nephrology, Neurology, Endocrinology, etc.)
Basic NICU/PICU	State-of-the-art NICU, PICU, Endoscopy, Pediatric Dialysis, iNO, HFO, 2D Echo
Treatment-based Care	Holistic, family-centered, and technology-driven healing
Partially focused on Children	Entire hospital ecosystem designed only for children

From Lucknow to the world, ALTIS-KIPS leads the way in specialized, compassionate & futuristic child care.

OUR STRENGTHS

- Exclusively Pediatric Superspeciality Setup.
- Expert Team of Multiple specialties under one roof.
- Child-Centric Environment, built for comfort & safety.
- Cutting-Edge Technology with human touch.
- Vision for Pan-India & Global Expansion in advanced pediatric care.

LIFE-SAVING CARE
BACKED BY TECHNOLOGY & EXPERTISE.

Department of CRITICAL CARE

About our Critical Care Unit

Our Expert Team

- ✚ **Dr. Digvijay Chaudhary** - Consultant Pediatric Intensivist
- ✚ **Dr. Suraj Mishra** - Consultant Pediatric Intensivist
- ✚ **Dr. Abhinav Agarwal** - Consultant Pediatric Cardiology
- ✚ **Dr. Shivani Bajpai** - Consultant Neonatology
- ✚ **Dr. Anupam Kumar** - Consultant Pediatric Intensivist

PICU Services

- 🌿 Bedside Echocardiography
- 🌿 Bedside Ultrasonography
- 🌿 Bedside Hemodialysis
- 🌿 Bedside EEG Monitoring

NICU Services

- 🌿 Modern Incubators
- 🌿 Optical Fiber Phototherapy
- 🌿 Conventional & HFO Ventilators
- 🌿 Inhaled Nitric Oxide Therapy
- 🌿 Therapeutic Hypothermia System

BECAUSE LITTLE TUMMIES
DESERVE BIG CARE

Department of PEDIATRIC GASTROENTEROLOGY, HEPATOLOGY & LIVER TRANSPLANT

World-Class Gut & Liver Care for Kids

Our Expert Team

- ✚ **Dr. Shrish Bhatnagar** - Director Pediatric Gastroenterology
- ✚ **Dr. Pratiksha Singh** - Consultant Pediatric Gastroenterology
- ✚ **Dr. Piyush Kumar** - Consultant Pediatric Surgery
- ✚ **Dr. Tripti Shukla** - Chief Pediatric Dietician

Our Speciality

- 🌿 Pediatric Endoscopy & ERCP (Diagnostic & Therapeutic)
- 🌿 Endoscopic Band Ligation, Foreign Body Removal, Stricture Dilation
- 🌿 Fibroscan, Hydrogen Breath Test
- 🌿 Comprehensive Support: Pediatrics, Pediatric Surgery, Dietary Care

Healing Little Heart with Big Experties

Department of PEDIATRIC CARDIOLOGY & CARDIAC SURGERY

World-Class Cardiology & Cardiac Surgery for Children

Our Expert Team

- ✚ **Dr. Abhinav Agarwal** - Director Pediatric Cardiology
- ✚ **Dr. Vijay Agarwal** - Director Pediatric Cardiac Surgery
- ✚ **Dr. Sunil Gundumala** - Consultant Pediatric Cardiac Surgery
- ✚ **Dr. Zeeshan Hakim** - Consultant Vascular Surgery

Non-Surgical Services

-  Pediatric 2D Echocardiography
-  Neonatal 2D Echocardiography
-  Fetal Echocardiography
-  Device Closure Procedures
-  Catheter-Based Interventions

Surgical Services

-  Surgical Closure of ASD, VSD, PDA, AVSD
-  Congenital Heart Disease Repair
-  Shunt Surgeries (BT Shunt, Glenn Shunt)
-  Fontan Completion
-  Pacemaker Insertion
-  Valve Repair / Replacement

Kashyap Institute of Pediatric Super Speciality

First-of-its-Kind Comprehensive Pediatric Superspeciality Hospital in U.P.

The Face behind Comprehensive Pediatric and Neonatal Care

ALTIS - KIPS

BECAUSE YOUNG MINDS
DESERVE EXPERT CARE

Department of **PEDIATRIC NEUROLOGY, NEUROSURGERY & REHABILITATION**

World-Class Neurology & Neurosurgery for Children

Our Expert Team

- ✚ **Dr. Vikrant Anand** - Director Pediatric Neurology
- ✚ **Dr. Nazish Malik** - Consultant Pediatric Neurology
- ✚ **Dr. Mohammed Amir** - Consultant Neurosurgery

Our Speciality

- 🌿 NICU with Neotherm (for Birth Asphyxia)
- 🌿 Cerebral Function Monitoring (CFM)
- 🌿 EEG & NCV Studies
- 🌿 Advanced Pediatric Neurosurgery
- 🌿 Physiotherapy & Neuro-Rehabilitation
- 🌿 Audiology & Developmental Support
- 🌿 Seizure Disorder & Epileptic syndrome

EXPERT HANDS FOR LITTLE KIDNEYS & BLADDERS

Department of PEDIATRIC NEPHROLOGY & UROLOGY

Advanced Pediatric Nephrology & Urology Department

Our Expert Team

- ✚ **Dr. Sakshi Sharma** - Consultant Pediatric Nephrology
- ✚ **Dr. Qazi Imran** - Consultant Urosurgery
- ✚ **Dr. Piyush Kumar** - Consultant Pediatric Surgery

Our Speciality

- 🌿 Acute & Chronic Kidney Disease Management
- 🌿 Renal Biopsy
- 🌿 Peritoneal Dialysis / Hemodialysis
- 🌿 Pediatric Urology & Surgical Care
- 🌿 Antenatal Hydronephrosis & CAKUT
- 🌿 Enuresis (Bedwetting) & Bladder-Bowel Dysfunction
- 🌿 Corrective & Reconstructive Urological Surgeries
- 🌿 Plasmapheresis

BUILDING STRONG SMILES FROM THE START

Department of PEDIATRIC DENTISTRY

Our Expert Team

- ✚ **Dr. Avani Jain** - Consultant Pediatric Dentist
- ✚ **Dr. Sudhir Sharma** - Consultant Orthodontics

Our Speciality

- Preventive Dentistry, fluoride application, sealants & oral hygiene guidance
- Tooth-colored fillings, crowns & restorative treatments.
- Dental trauma care & fractured teeth management
- Space maintainers & interceptive orthodontics
- Painless root treatment for primary teeth
- Habit correction therapy, thumb sucking, tongue thrusting & mouth breathing
- Child-friendly sedation & behavior management techniques

Advanced Dentistry Department

BECAUSE EVERY CHILD DESERVE EMOTIONAL WELLNESS

Department of PEDIATRIC PSYCHIATRY & MENTAL HEALTH

Our Expert Team

- ✚ **Dr. Ankita Garg** - Consultant, Child & Adolescent Psychiatry

Our Speciality

- Emotional, Behavioural & Developmental Concerns in Children & Adolescents
- Attention, Learning & School-Related Difficulties
- ADHD & Autism Spectrum Disorders
- Internet/Screen Addiction
- Anxiety Disorders, Depression, OCD, Selective Mutism & Self-Harm
- Parenting Guidance, Behaviour Management & Therapy
- Adolescent Mental Health Concerns

Advance Mental Care For Every Child

SAVING SIGHT IN EVERY
PREMATURE LIFE SAVED

ALTIS-KIPS

Department of PEDIATRIC OPHTHALMOLOGY

Our Expert Team

- ✚ **Dr. Gaurav Kohli** - Director Pediatric Ophthalmology
- ✚ **Dr. Anam Masood** - Consultant Pediatric Ophthalmology

Our Speciality

- ✚ Pediatric Orthoptics and LASER with ROP surgery
- ✚ Retinopathy of prematurity (ROP) Screening
- ✚ Pediatric uveitis
- ✚ Pediatric glaucoma
- ✚ Pediatric cataract
- ✚ Pediatric squint and Occuplasty Surgery
- ✚ Pediatric ocular trauma and globe reconstruction
- ✚ Pediatric Retinal surgery
- ✚ Ocular Oncology & retinoblastoma

World Class Ophthalmology Surgery for Children

ADVANCE CARE FOR GROWING
BONES & ACTIVE FUTURE

Department of Pediatric Orthopaedic

Our Expert Team

- ✚ **Dr Atif Naseem** - Consultant Pediatric Orthopaedic

Our Speciality

- ✚ Pediatric care for bone, joint & spine disorders (newborn-adolescent)
- ✚ Management of congenital deformities – CTEV, DDH, limb defects
- ✚ Advanced care for fractures & trauma
- ✚ Treatment of spine conditions – scoliosis, kyphosis
- ✚ Care for cerebral palsy & neuromuscular disorders
- ✚ Management of bone & joint infections
- ✚ Minimally invasive & corrective surgeries
- ✚ Child-friendly care with Level 3 NICU & PICU support
- ✚ Multidisciplinary, outcome-focused approach

Advanced care for fractures & trauma

BECAUSE GROWING BODIES
NEED EXPERT BALANCE

Department of PEDIATRIC ENDOCRINOLOGY

Our Expert Team

- ✚ **Dr. Vikrant Anand** - Consultant Pediatric Endocrinology
- ✚ **Dr. Piyush Kumar** - Consultant Pediatric Surgery

Our Speciality

- Pubertal Disorders (Early/Delayed Puberty)
- Diabetes Care (Type 1 & Type 2)
- Thyroid Disorders Treatment
- Obesity & Metabolic Syndrome Management
- Pituitary & Adrenal Disorders
- Disorders of Sex Development (DSD)
- Inborn errors of Metabolism

"Expert Endocrine Care for Healthier Futures."

BECAUSE EVERY TINY LIFE BEGINS
WITH EXPERT CARE

Department of FETAL MEDICINE & GENETICS

Our Expert Team

- ✚ **Dr. Shipra Dwivedi** - Consultant, Fetal Medicine & Genetics

Our Speciality

- Diagnosis of Fetal Anomalies 3D & 4D Ultrasound Scans
- Genetic Counselling
- Fetal Echocardiography
- Amniocentesis & Chorionic Villus Sampling
- Fetal Reduction Procedures

"Advanced Fetal Care, Guiding Families with Compassion."

BECAUSE LITTLE EARS, NOSES AND
THROATS NEED GENTLE CARE

Department of PEDIATRIC ENT

Our Expert Team

+ **Dr. Saurabh Shrivastava** - Consultant
ENT Surgery

Our Speciality

- Management of Ear Infections & Congenital Ear Disorders
- Hearing Loss Evaluation & Treatment
- Allergy & Sinus Care
- Tonsillitis, Adenoid Problems & Sleep Apnea
- Pediatric Airway Management & Endoscopic Procedures
- Laryngomalacia
- Choanal Atresia

"Specialized ENT Care for Healthier Childhoods"

BECAUSE EVERY LITTLE VOICE
DESERVES TO BE HEARD

Department of AUDIOLOGY & SPEECH THERAPY

Our Expert Team

+ **Dr. Ankita Kumari** - Audiologist & Speech
Language Pathologist

Our Speciality

- Newborn Hearing Screening (OAE)
- Auditory Brainstem Response (ABR) - Screening, Threshold & Diagnosis
- Tympanometry for Middle Ear Disorders
- Hearing Aid Fitting & Cochlear Implant
- Therapy for Misarticulation, Stuttering & Fluency
- Voice Disorders (Hyperfunctional, Puberphonia, Androphonia)
- Delayed Speech & Language Development

"Comprehensive Hearing, Speech & Language Care for Children."

Advance Machines that Power Possibilities

Optic Fiber Phototherapy (Bili Blanket Therapy)

A gentle and effective treatment for newborn jaundice using fiber-optic blue light. The soft light pad delivers safe light through the baby's skin, helping break down excess bilirubin for easy removal from the body.

- Comfortable and safe.
- No need for eye protection.
- Allows feeding and bonding during therapy.
- Ideal for mild to moderate jaundice.

Modern care for brighter, healthier beginnings.

NeoTherm Therapeutic Hypothermia

An advanced treatment for birth asphyxia (HIE – Hypoxic-Ischemic Encephalopathy) in newborns. The NeoTherm system safely lowers the baby's body temperature to 33.5°C for 72 hours to protect the brain from further injury.

- Precisely controlled cooling and rewarming.
- Continuous temperature monitoring.
- Reduces risk of brain damage and improves outcomes.
- Safe, gentle, and evidence-based therapy.

NeoTherm – Cooling care that protects tiny brains.

INO Therapy in NICU

Inhaled Nitric Oxide (iNO) is a life-saving treatment used in the NICU to manage newborns with severe breathing difficulties such as PPHN (Persistent Pulmonary Hypertension of the Newborn). It helps open lung blood vessels, improving oxygen delivery safely and effectively.

- Enhances oxygen levels quickly.
- Acts only in the lungs – minimal side effects.
- Reduces the need for advanced support (ECMO).
- Proven, precise, and gentle therapy for newborns.

iNO – Helping tiny lungs breathe easier.

HFO (High Frequency Oscillatory Ventilation)

HFO is an advanced ventilation mode used in the NICU for babies with severe respiratory distress when conventional ventilation is not enough. It delivers very small breaths at rapid rates (up to 900/min) to keep the lungs open and improve oxygen exchange gently.

- Provides effective oxygenation with minimal lung injury.
- Ideal for conditions like RDS, PPHN, air leaks, and MAS.
- Gentle and precise lung protection strategy.
- Continuous, stable ventilation support.

HFO – Gentle waves of breath for fragile newborn lungs.

Dialysis with SLEDD (Sustained Low-Efficiency Daily Dialysis)

SLEDD is a gentle and effective dialysis method used in the NICU/PICU for babies and children with acute kidney injury or fluid overload. It combines the benefits of conventional dialysis and continuous renal therapy, providing safe and controlled blood purification.

- Gentle on the heart and circulation.
- Better fluid and toxin removal.
- Flexible and well-tolerated for critically ill patients.
- Allows longer, smoother dialysis sessions (6–12 hours).

SLEDD – Safe, steady, and smart dialysis for delicate lives.

Endoscopy in Children

A safe, minimally invasive procedure used to diagnose and treat digestive or airway problems in children using a flexible camera tube (endoscope).

- Quick and child-friendly.
- Helps detect causes of vomiting, bleeding, or pain.
- Allows therapeutic procedures (biopsy, foreign body removal).
- Performed under safe sedation.

Pediatric Endoscopy – Gentle precision for little patients.

Laser Therapy for ROP (Retinopathy of Prematurity)

A proven treatment to prevent vision loss in premature babies with ROP. The laser targets abnormal retinal blood vessels, stopping disease progression and protecting eyesight.

- Safe and effective vision-saving therapy.
- Performed under gentle anesthesia.
- Prevents retinal detachment and blindness.

Laser for ROP – Protecting the vision of premature eyes.

High-End Incubators with Apnea Sensor & Transport Incubators

Advanced incubators designed to provide a stable, warm, and safe environment for newborns, with built-in apnea sensors for real-time breathing monitoring.

- Precise temperature and humidity control.
- Continuous apnea and vital sign monitoring.
- Gentle, quiet, and baby-friendly design.
- Transport incubators ensure safety & stability during transfers.

Smart Incubators – Total protection, from NICU to transport.

7-Parameter Monitoring

Comprehensive bedside monitoring for critically ill newborns and patients. Tracks 7 vital parameters for complete clinical insight.

- ECG & Heart Rate
- SpO₂ (Oxygen Saturation)
- NIBP (Blood Pressure)
- Temperature
- Respiration Rate
- EtCO₂ (Carbon Dioxide)
- IBP (Invasive Blood Pressure)

7-Para Monitor – Complete care at a single glance.

Indoor ABG, 2D Echo, X-Ray, USG & Pathology

Comprehensive in-house diagnostic facilities for quick and accurate care.

- Rapid ABG analysis.
- 2D Echo for cardiac evaluation.
- Digital X-Ray & Ultrasound.
- Full pathology support.

All diagnostics under one roof – fast, precise, reliable.

Conventional Ventilators with HFNC & CPAP

Versatile systems offering precise respiratory support for newborns.

- Gentle, effective ventilation.
- Stable oxygen delivery.
- Supports all levels of respiratory distress.
- Smart breathing care for fragile lungs.
